

Policy regarding replacements.

The EABA recognises this is an emotive issue that can lead to differences of opinion, nevertheless the aim of the EABA is to avoid byes, sustain playing time and hence maximise value for money for all competitors wherever possible. The policy is only applicable after the round – robin format.

The relevant tournaments are: (a) The English Amateur Championship.

(b) The Grand Masters Championship.

- (a) The policy can be implemented between regional and the last 16 north & south and also between the last 16 north & south and the last 16 nationally (i.e. the K. O. Stage)

Any replacement will be made as follows:

Someone from the same region (not just the same group) with 2 wins from 3 in groups of 4, or 1 win from 2 in groups of 3. If there is more than one such candidate then points difference will be considered. The EABA recognises that it is mathematically possible but highly unlikely for all such candidates from groups of 4 to have one win. If this occurs the best points difference will prevail. If the number of regional entries is such that unequal group sizes (some 3 and some 4) are unavoidable the above principles will still be employed and points difference will decide between 1:2 and 2:3 ratios.

- (b) The policy will be used between regional qualifying and finals day using the same criteria.

Notes: Absenteeism on the day is already covered in the tournament rules.

The policy will only be implemented when a player who has already qualified for the next stage has to withdraw and gives sufficient time for the Association to react.

The EABA will always apply the policy in a fair and equitable way bearing in mind that differing circumstances and the unforeseen can and do occur.
